Classic Door
Collection

SAFE & SOUND

Your front door is the first point of contact with your home. With the reassuring ‘clunk and click’ as it closes behind you, you’re able to shut rest of the world outside, relax and unwind.

Our range of high security, low maintenance and energy efficient, traditional and contemporary composite front and back doors, has been specially selected to give you a choice of design and style to perfectly compliment your property. You can’t choose a better composite door.

FIVE EASY STEPS

NOT ALL DOORS ARE MADE EQUAL

Our composite doors combine the latest innovations, to keep your home warm and secure, whatever the weather. Emulating the natural beauty of wood with an energy efficient warm core technology and high security multi-point locking system, our composite doors are an elegant addition to any home.

Manufactured to the British Standards Institute kitemark accreditation for Quality Management, BS19001, they're also built to last.

Multi-point locking
High security steel hooks fully penetrate the door frame keeps, which help to prevent the door sash and frame from being forced apart. A steel deadbolt delivers maximum strength to the centre of the door.
3* cylinder fitted as standard.

1 The appearance of natural timber but without the maintenance

Composite doors emulate the natural appearance of a traditional timber door but without the associated maintenance. They won't warp or expand and don't require painting. A tough and durable timber-grain effect thermoset GRP skin, will stand up to the knocks bangs and scrapes that family life throws at it!

2 Insulated thermally efficient core

Our doors are manufactured from a thermally efficient and tough high density polyurethane foam core. This has been specially developed to significantly reduce the transfer of heat, making our doors almost 20 per cent better at keeping the warmth inside your home and your energy costs lower, than a traditional solid timber door.

3 Sound insulation

The polyurethane core offers great sound insulation, reducing outdoor noise by an average of 31dB.

4 Colour choice

Choose from seven standard -colour finishes or a choice of 36 bespoke colour options, making the colour choice for your home as individual as you are.

5 Weathertight

The insulated core is protected from water and moisture ingress by a high performance polymer skin. This is specially constructed to prevent the delamination which can effect lesser quality doors, guaranteeing performance for years to come. Strong stainless steel door hinges and robust gaskets ensure that the door makes the perfect seal against the frame. Our doors are also fully tested to all relevant British Standards.

6 Energy efficient glazing

Our doors feature the latest in energy efficient double and triple-glazed glass technology to keep your home warmer. Manufactured to the British Standard BS1 EN1279, this includes a full choice of glass types and styles from privacy glass to coloured, crystal and leaded finishes, which means you can design the perfect door for your home.

7 Secured by Design handles and hardware

Our doors are manufactured to the highest security standards, featuring police approved Secured by Design multi-point locking mechanisms, keeps and handles as standard. They're anti-lift, anti-drill and anti-pick, meeting and exceeding all current building standards including PAS24:2016, because your security and that of your home and family, matters.

8 Mobility

All of our doors come with an optional mobility low threshold, ideal for wheelchair use or with pushchairs. Our hinges also open past 90 degrees for optimal access.

9 Door furniture

Define your style with a choice of handles, letter-plates, door knockers and spy holes available in satin, white, gold, chrome and black finishes

10 Hinges

High spec hinges with traditional and improved aesthetics without any compromise to the user friendly mechanics or security performance. Our hinges also open past 90 degrees for optimal access.

With one home in England and Wales broken into every seven seconds – the majority by forcing or kicking a door – your front or back door is at the ‘frontline’ in the battle to protect your home from intruders. All of our doors are supplied to a Secured By Design standard - as standard.

PEACE OF MIND BUILT IN

This means that they meet not only the requirements for door security set out in PAS24:2016 and Part Q of Building Regulations but have been independently tested as doing so, as defined by the police approved Secured by Design scheme

Setting the standard for door security

Our doors have been independently tested against the following type of assault

- Manual attack on the locking hardware with tools including screwdrivers, chisels and mole grips
- Three minute attacks on the door cylinder using a range of tools including craft knives and screw drivers
- Three minute manual attacks using chisels and brick bolsters
- Hard-body impact testing of the leaf, hinge and locking points using a 50kg steel impactor.

Multi-point locking
High security steel hooks fully penetrate the door frame keeps, which help to prevent the door sash and frame from being forced apart. A steel deadbolt delivers maximum strength to the centre of the door. 3* cylinder fitted as standard.

High security door cylinder
Anti-bump, anti-drill, anti-pick and anti-snap Kitemarked cylinder lock barrels fitted as standard.

Reinforcement and thickening of door frame
The use of reinforcements and local thickening of the door frame provide a stronger fix and improved hardware retention and screw through-pull, locking the sash and frame firmly together..

Laminated glass units
Internally glazed 4mm toughened laminated glass double or triple-glazed energy efficient units provide increased resistance to attack.

Robust hinges
Supplied as standard, stainless steel hinges provide resistance to resistance testing with 50kg steel impactor.

10 YEAR GUARANTEE

DURABLE AND LONG-LASTING, A DOOR WITH PEDIGREE, TRIED AND TESTED FOR OVER 20 YEARS

- Strength from its construction
- High impact resistant door skins
- Stability, whatever the weather conditions
- A full 10-Year Guarantee

PEACE OF MIND BUILT IN

*1 year guarantee on standard gold and chrome hardware

SECURITY LOCKED IN... INTRUDERS LOCKED OUT.

Our Thumbturn features the unique patented Click Secure™ operation. Specially designed to beat the wire bypass entry threat associated with standard thumbturn locks. Document Q building regulations and PAS24 compliant design.

3 keys as standard

Anti drill

Anti snap

Anti screwdriver

Click Secure™ technology
Anti-manipulation wire bypass system

Anti-pick technology
Auto locks on external side when picked

Smooth key entry

Anti-bump technology

2x Active pins

Internal pins mean that the cam is not floating and so can not be rotated by wire bypass tools.

10 anti-drill pins
Throughout the cylinder!

Molybdenum Locking Cam

Break Secure (ABS) patented system that locks the cam in place when attacked.
20% stronger than steel for ultimate resistance to lock snapping attacks.

2x Break zones
Sacrificed when snapped

Push to operate
Prevents operation via letterbox

- SS312 Sold Secure Diamond Grade
- 3 Star British Kitemark - TS007:2014 (KM 586153)
- Secured by Design Accredited (Police preferred specification)
- Patented Snap Secure Technology
- Pick, Drill & Bump Resistant
- Dual colour polished Chrome/Brass or Matt Brass options

- 6 Trap Pins for advance pick resistance
- 10 Anti-drill pins
- Unique "Click Secure" thumbturn design
- Double, and thumbturn formats available
- Three keys per cylinder
- Keyed alike key/key pairs are available ex stock
- Master keying on request

Almost all white goods that we buy come with a colour coded and alphabetical energy rating running from A to G, with 'A' indicating the highest level of energy efficiency.

Well, it's exactly the same for doors and windows.

UNDERSTANDING DOOR ENERGY EFFICIENCY

The exact energy efficiency of your new door will depend on a number of different factors including the style of door you choose and glass but all feature our warm core foam technology.

This maximises the thermal efficiency of your new composite door, making it up to almost 20 per cent more energy efficient than a traditional solid timber door.

- 1 Foam core**

High Density polyurethane foam core provides an insulating thermal barrier between warm air inside the home and cold air outside
- 2 Thermally efficient door frame**

Multi-chamber thermally efficient composite door frame

- 3 High performance door gasket**

High performance door gasket and adjustable door hinges deliver a firm and consistent compression between the door frame and sash, stopping draughts.
- 4 Threshold**

Weather proof threshold and brushes reduce the flow of air under the door

CHOOSING YOUR DOOR

Your choice of door defines the individual character of your property. Choose the perfect complement for your home from our refined collection of energy efficient and beautifully crafted doors.

From the elegant understatement of a traditional design or stylish contemporary statement door, you can build the perfect match for your property.

This includes a choice of finish from a carefully chosen palette of colour options, sophisticated glass designs and as a final touch, combining function and form, our range of high quality door furniture.

- 1 **STEP ONE**
Choose your door style from one of 10 elegant traditional and stylish contemporary designs
- 2 **STEP TWO**
Choose your side light if required
- 3 **STEP THREE**
Select a colour option from one of seven standard colour finishes or a choice of 36 bespoke colour options
- 4 **STEP FOUR**
Choose a glass design
- 5 **STEP FIVE**
Pick your favourite options from our high quality range of door furniture

ELEGANCE RANGE

Simple and understated, elegance makes the perfect choice as either a front or back door. Half-glazed, it allows light into your home but balances this with a solid bottom panel. It's available in either square or arched glazed options.

CLASSICAL HALF GLAZED

Featuring the same timeless design as the Classical door, replacing solid panels with glass in the top four panels, the Classical Half-Glazed is a light and airy option but one which still benefits from traditional styling.

STABLE DOORS

Our stable doors make a classic addition to any rural home but are suitable for use in a far wider range of properties, as a back door. Combined with our range of heritage colours, they bring a touch of period charm to your property.

FLEXIBILITY

Featuring the independent operation of the bottom and top door leaf, Stable Doors deliver added flexibility, allowing you to open the top half of the door while keeping the bottom half closed keeping pets or small children safely inside.

SOLID CONSTRUCTION

Our cottage door is custom made, featuring a rigid sub-frame, which runs right around both the top and bottom frames. This gives it far greater strength than doors which have been adapted from other ranges, also making it more secure while a specially designed rebate and rain protectors deliver superb weather tightness.

DEDICATED HARDWARE

The same custom approach has also been applied to hardware. All hinges and locking mechanisms have gone through rigorous suitability testing. This includes the specially designed rack bolt which joins and locks the top and bottom half of the door into place. It also features easy to operate internal thumb-turn locking mechanisms and features a secure multi-point locking system.

With its clean crisp sightlines, flush finish and bold glazing options Esprit is a true statement door. Evoking the glamour of the art deco period, its sophisticated styling is carried through to a dedicated contemporary hardware range.

CONTEMPORARY DOORS

DOOR LIGHT AND GLASS OPTIONS

Esprit provides a canvas for your creativity. It's your choice of door light design and the glass that you decide to put in it, that really brings this stylish and contemporary door to life.

Door light design options include minimalist single centre or off-centre designs, through to repeating 'stacked' designs. A choice of cool curves or stunning diamond bursts lights are also available.

Shape the character of your door further with your choice of glass, from simple privacy glass to more detailed designs.

HARDWARE OPTIONS

In addition to our standard ranges, Esprit comes with a dedicated range of pull handles. Available in three different sizes, handles feature a contemporary satin stainless steel finish, the refined design providing the all-important finishing touch to the design of your door.

Thumbturn Cylinder

With our Unique "Click Secure" thumbturn design our thumbturn euro cylinder provides a simple method of opening and closing the door from the inside without a key, and allows for a quick and safe exit in the event of a fire.

FRAMING YOUR DOOR

FRAMING YOUR DOOR

YOU CAN ALSO CHOOSE THE COLOUR AND FINISH OF YOUR DOOR FRAME.

The classic design of a white door frame against a solid door colour provides contrast, showing off your door but you can also choose subtle combinations, which will connect your door to the fabric of your home that surrounds it.

Choose from standard white, light oak or rosewood finishes or your individual colour choice.

You can also choose to have a colour finish on the outside and white inside, or any combination of colours inside and out.

GLASS OPTIONS

CHOOSE THE PERFECT DESIGN FOR YOUR HOME

The decorative touch that defines your door, our wide range of glass options offer you the perfect choice from the simplicity of privacy glass to the detailed, beautiful and intricate Traffic Grey A work and crystal of Andorra. All come as triple glazed as standard.

Whatever your preference, all of our doors are internally glazed, while glass units achieve top ratings for energy efficiency, keeping your home safe, warm and welcoming.

HANDLES, HARDWARE & DOOR FURNITURE

Your door handle is the part of your new door that you'll touch each and every day. Your letter plate, choice of knocker, all come together to put the all-important finishing touches to your new door.

Whether you're designing a contemporary, bold, statement door, or recreating the timeless charm of a period installation, we can offer you the perfect choice of lever, pad lever, heritage or contemporary pull handles available in white, gold, chrome black and satin finishes.

We also offer a Long Lever easier to grip Handle (3rd column above) which offers a greater, smooth action and low operating forces required to operate handle. The ample lever-to-door surface clearance option, are Compliant with Document M of the The Disability Discrimination Act (DDA), which states that the door handle needs to be able to be operated one handed without tightly grasping or any twist on the wrist.

Stainless steel options are available, for ultimate corrosion resistance which come with a 10 year guarantee, 1st column above.

Appearance and finish on hardware is subject to change.

TECHNICAL INFORMATION

CONSTRUCTION

All of the doors featured in the Classic Door Collection are manufactured to the highest standards in composite door design.

DOOR PANEL

Each door panel is built around a perimeter sub-frame of a solid, water-resistant polymer material. A high impact thermoset GRP skin is bonded to sub-frame and the core of the door is then filled with high density, polyurethane foam. Water resistant polymer composite rails protect the core from damage or water absorption.

All standard solid colours are pre-pigmented and through-coloured. All other colours are over-sprayed with a durable paint.

FRAMES

Low maintenance and thermally efficient door frames are extruded and manufactured in the UK. Featuring six energy efficient chambers they deliver a high level of insulation, helping to keep your home warmer.

RELEVANT UK STANDARDS

- Achieves BS 6375-1 for weather tightness, air, wind and water
- Achieves PAS 24 security standard, a prerequisite for achieving Secured by Design status
- All doors meet or exceed UK Building Regulations U-value (heat loss) requirements of 1.6 W/M K

10-YEAR GUARANTEE

On both the door and hardware
